

JULIO ADRIÁN GUEVARA SALAZAR

Guadalajara, Mexico
adriangs19623@gmail.com | +52 384 118 1095

PROFESSIONAL SUMMARY

Results-driven Software Developer and CRO Specialist with 8+ years of experience, specializing in Shopify OS 2.0 and e-commerce revenue optimization. Adept at combining applied conversion psychology with technical execution to drive measurable impact on CVR, AOV, and LTV. Proven ability to architect high-performance, low-friction storefronts and execute rapid A/B testing strategies that significantly lift overall conversion rates, utilizing AI-assisted workflows for fast, lean execution without over-engineering.

EXPERIENCE

High Street | Software Developer & CRO Specialist

Nov 2022 – current

Mexico

- Led Revenue-Focused CRO: Directed ongoing A/B testing strategy (≥4 experiments/week to statistical significance) using Intelligems. Applied conversion psychology to successfully increase the overall store CVR from 0.5% to 1.2%, consistently achieving 20–30% uplifts in winning tests to drive AOV and revenue.
- Shopify OS 2.0 & Performance Optimization: Overhauled theme architecture using Liquid and JavaScript. Significantly reduced load times and improved Core Web Vitals by removing app bloat and eliminating friction across the homepage, product pages, and cart flow.
- Data-Driven Execution: Collaborated with marketing to translate metrics (LTV, bounce rate) into actionable technical solutions. Delivered 20+ custom internal tools and automations to replace heavy vendor software and improve funnel efficiency.
- High-Speed Development & Leadership: Managed 2 developers with a focus on accountability and speed of delivery. Accelerated rapid iteration using AI-assisted development tools to execute tests and deploy features efficiently, strictly avoiding over-engineering.

Bitcon Solutions | Software Developer

Jul 2019 – Oct 2022

Guadalajara, Jalisco

- Built new modules for the corporate UXBI ERP application using ExtJS (frontend) and Laravel (backend).
- Provided maintenance and production support; troubleshoot issues on production servers and delivered fixes with minimal downtime.
- Solved complex technical problems by developing advanced MySQL reports and optimizing query performance for large datasets.
- Worked in Scrum teams, collaborating with stakeholders to refine requirements and deliver incremental value.

Mozcalti (Actyva Tics) | Software Developer

Nov 2018 – May 2019

Ameca, Jalisco

- Developed web applications in Core Java and Spring Boot following MVC architecture.
- Built UI components with Bootstrap and jQuery; designed and consumed RESTful APIs within a Microservices architecture.
- Wrote automated tests (unit and integration) with JUnit to improve reliability and reduce regression defects

Universidad de Guadalajara | Software Developer (Projects)

Aug 2017 – Nov 2018

Ameca, Jalisco

- Delivered multiple software projects including websites and desktop applications.
- Built Laravel-based web systems and Java Swing desktop apps; designed PostgreSQL schemas and queries.
- Applied Scrum for iterative delivery and Waterfall when required by project constraints.
